- 3. The Cost Principle** Assets should be recorded at their original purchase price, not their current market value.
 - Significance:** Ensures objectivity and verifiability; Simplifies the recording process.

 - Application:** Recognize expenses when incurred; Recognize revenue when earned.
- 5. The Revenue Recognition Principle** Revenue is recognized when it is earned and realizable, regardless of when cash is received.
 - Details:** Sale completion marks revenue recognition; Important for accurate profit measurement.

 - Purpose:** Prevents overly optimistic financial reporting; Ensures stakeholders are not misled.
- 7. The Consistency Principle** Companies should apply the same accounting methods consistently across periods to enable comparability.
 - Benefits:** Facilitates trend analysis; Enhances reliability of financial data.
- 8. The Materiality Principle** Financial information should be disclosed if its omission or misstatement could influence users' decisions.
 - Considerations:** Materiality depends on the size and nature of the item; Ensures relevant information is reported.
- 9. The Objectivity Principle** Financial reports should be based on objective evidence and free from personal bias.
 - Examples:** Use of invoices, receipts, and other verifiable documents; Avoidance of subjective judgments.
